The Ace Flex flooring system is our high performing, low floor height system. It is designed to offer uniform performance across the entire system. The sports parkett is precision machined for Ace in Sweden and features the Woodlock 5s next generation, unique jointing system.

Ace Flex 42 is available in a wide variety of timber surface options, to create area elastic sprung floors, with traditional or contemporary aesthetics.

The system consists of a technical foam elastic layer, a load distribution board and a high quality engineered, and prefinished, hardwood board surface.

In line with our ethical procurement policy and dedication to sustainability, the system can be supplied with FSC® (Forest Stewardship Council) Chain of Custody Certification or PEFC™ (Program for the Endorsement of Forest Certification) Chain of Custody Certification.

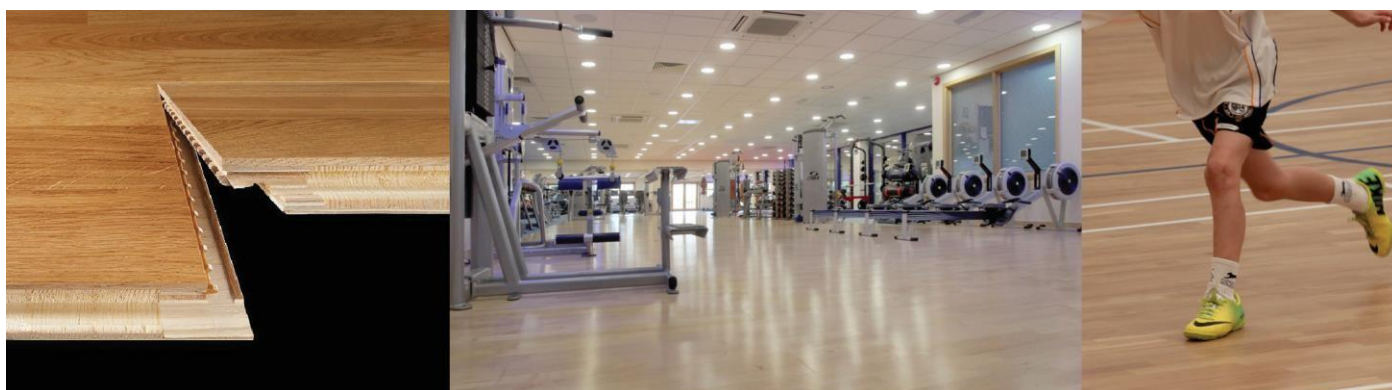

The system is fully tested and accredited to EN14904 standard

- passing the highest A4 category. It has also been tested to the German DIN 18032 part 2 performance flooring standard, with completely uniform performance.

- ✓ Suitable for overlaying existing floors
- ✓ Meets the requirements of EN14904
- ✓ FSC® (Forest Stewardship Council) Chain of Custody option Certification or PEFC™ (Program for the Endorsement of Forest Certification) Chain of Custody Certification
- ✓ Low construction height
