**Herculan MF** sports surfaces are eco-friendly, seamless and cushioned Multi Functional floors with point elastic properties.

**Herculan MF** sports surfaces meet all the latest European Standards for multi purpose indoor sports surfaces, the EN 14904:2006. **Herculan MF** quality sports surfaces are accredited with the CE Certificate of Conformity. The **Herculan MF** systems are listed as certified and approved sports floors in the Dutch Olympic Committee's sports flooring list.

**Herculan MF** sports surfaces are certified by the International Handball Federation [IHF], the Badminton World Federation [BWF] and the FIBA Associate [FIBA].

The **Herculan MF** system passes the German AgBB/DIBt emission test and is rated as safe for indoor building materials.

The high performance, seamless surface of the **Herculan MF** system is non-porous, therefore hygienic and easy to clean. **Herculan MF** systems provide the optimum slide and slip resistance required in today's most demanding sports. Due to its high mechanical strength and elastic properties of the Herculan EX 800 thickness layer and the excellent wear resistance of its Herculan PU 145 or Herculan PU 100W top-layer, this tough and durable sports surface can also be used for exhibitions, concerts, speech-days and all kinds of other non-sports functions without extra protection.

All Herculan Sports Surfaces are easy to maintain and can be resurfaced quickly and economically when required.
